JISIM 仟思盟

0/1-10V PWM RX Dimmable LED Driver

CB ĽK @ Œ & C € SELV ErP RoHS

Product introduction

JISIM JD2141 is a 25W constant current LED intelligent dimmable driver specifically designed for built in driver $luminaires.\ it\ supports\ deep\ dimming\ functions\ such\ as\ 0-10V,1-10V,10V\ PWM, and\ RX. The\ customized\ dimming\ dimming$ curve provides a more comfortable viewing experience for the human eye. When not connected to an external $signal, it\ can\ be\ used\ as\ a\ non-dimmable\ driver\ and\ supports\ a\ gradual\ start-up\ effect. It\ is\ suitable\ for\ LED\ Track$ light, LED surface-mounted downlights, LED wall lamps. Paired with various intelligent control systems, it is widely used in smart homes, smart hotels, intelligent commercial spaces, smart offices, smart buildings, and other facilities.

Product Features

- Compact SELV built in Dimmable Driver
- Support 0-10V,1-10V,10VPWM,Rx dimming
- Glue filling process, Global Certification
- Suitable for Class I/ II / III indoor light fixtures
- DIP switch for multi-current setting, Max. output power 25W
- Up to 30000 hours life time,5-Year Warranty(Long-lasting Capacitor)
- $\bullet\,$ Small size and light weight, High power factor, High Efficiency, Low THD
- The housing is made from V0 flame retardant PC materials from CHIMEI
- Smooth dimming, flicker-free, dimming range: 0.3-100% Standby power consumption < 0.5 W, meets ErP energy efficiency certification

Technical Specifications (All parameters not specially mentioned are measured at 230VAC input, full load and 25°C of ambient temperature)

- ★ * Factory default.
- 1. Please disconnect the AC input before adjusting the output current via the DIP switch, If not, it may damage the lighting fixture.
- 2. No Overload, The output power should be less than or equal to 25W.

Max.25W Constant Current Light Fixture

0/1-10V PWM RX Dimmable LED Driver

Explanation of 0/1-10V Interface Signals

◀ The DIM+ terminal is used to adjust brightness:

When the voltage at the DIM+ terminal is adjusted within the range of 0/1-10V, the brightness changes from 0 to 100%. The light turns on/off at a voltage value of 1.1 \pm 0.05V.

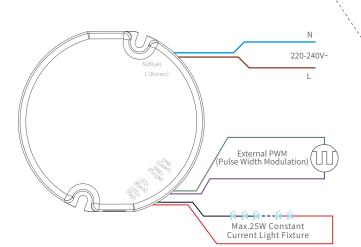

When DIM+ terminals is left floating (unconnected), the default output is 100% Brightness.

Potentiometer (Rx) Interface Signal Description

◆ The DIM+ terminal is used for adjusting brightness:

When the resistance value at the DIM+ terminal is adjusted within 0-100 K Ω ,the brightness changes from 0 to 100%. Specifically, a resistance value of $3 K\Omega \pm 1 K\Omega$ triggers the light to turn on/off.

When DIM+ terminals is left floating (unconnected), the default output is 100% Brightness.

o PWM Interface Signal Description o

The DIM+ terminal is used for adjusting brightness: When the 10V PWM signal at the DIM+ terminal is adjusted from 0 to 100%, the brightness changes correspondingly from 0 to 100%.

When DIM+ terminals is left floating (unconnected), the default output is 100% cool Brightness.

Installation Instructions

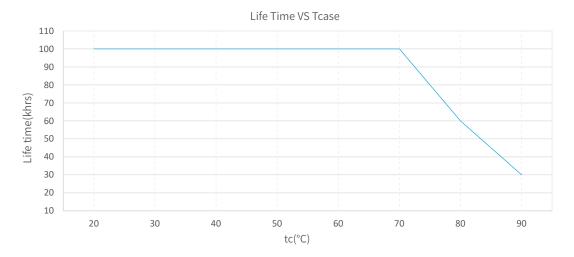

Interface	Marking	Description	
Input	N	Input terminal of AC neutral wire	
	L	Input terminal of AC live wire	
Output	LED-	Negative electrode output of the driver	
	LED+	Positive electrode output of the driver	
Signal	DIM-	Negative electrode input 0-10V/PWM/RX dimming	
	DIM+	Positive electrode input 0-10V/PWM/RX dimming	

Connection instructions

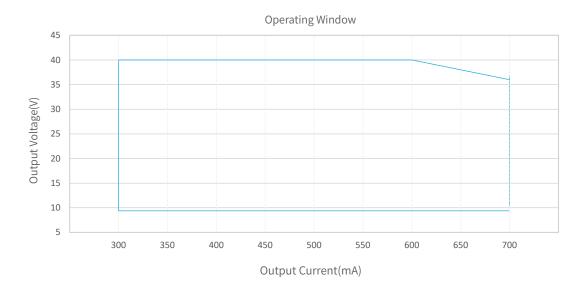

- 1. Check the color of the interface and cable carefully before wiring.
- 2.All connections must be as short as possible to ensure good EMI performance.
- $3. No \ secondary \ switches \ are \ allowed.$
- 4. The driver output does not support hot swap
- 5.Incorrect wiring can damage the LED.

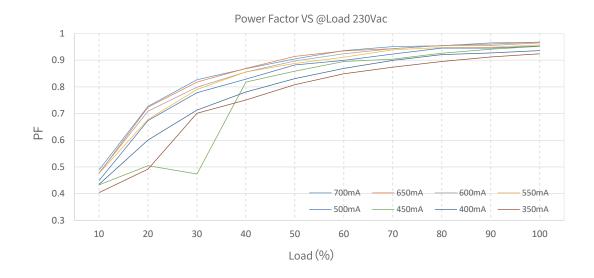

Product Characteristic Curves

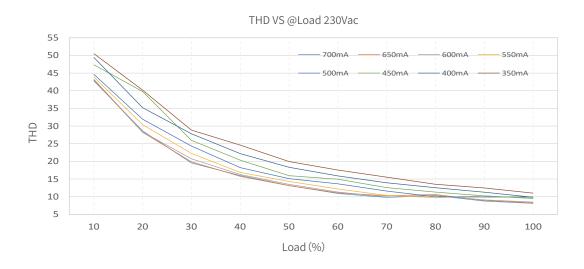

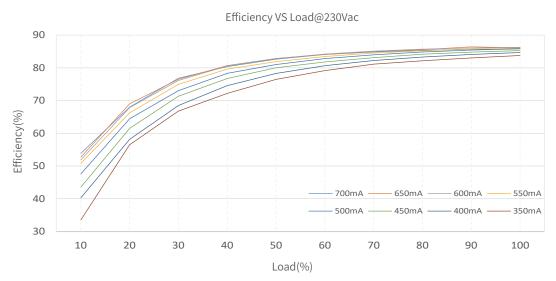

The life-time of the LED driver is shown in the figure above calculated (based on the 90% survival rate). The relation of tc to ta temperature depends also on the luminaire design.

Packaging Image >>>>----

Packaging Size

i	Packaging Details Carton Size		Packing Units	Weight	
	Inner Packaging Box	74x 75 x 33mm	1pcs	135.9±10g	1
i	Small Carton Packaging	350 x 197 x 167mm	48pcs	6.82kg	
	Large Carton Packaging	420 x 360 x 365mm	192pcs	28.19kg	1

Packaging instructions:

Each large carton packaging contains 4 small carton packagings, Each small carton packaging contains 48 inner packaging boxes.

Cautions

- > This product is used as a componentin conjunction with a lighting fixture. Due to the influence of EMC from the lighting fixture and wiring, customers should perform EMC testing to confirm the entire product set.
- No operation with power on. Installation and debugging should be performed by qualified professionals. Please read the product manual carefuly before installation.
- ➤ This product can be installed inside the luminaire for use, but the internal temperature of the luminaire must be strictly controlled to not exceed 60°C.

 Exceeding this temperature may adversely affect the service life of the luminaire.
- ▶ This product is not waterproof and should be avoided from direct sunlight and rain. fit is installed outdoors, please use a waterproof case.
- > Good heat dissipation conditions are beneficial to the product's lifetime. Please install the product in a suitable environment, and strictly prohibit using double-sided tape to attach the casing or circuit board.
- > Please check the parameters of the LED driver to ensure they meet the application requirements of the lighting fixture.
- > Please install according to the standard wire gauge specified in the manual to avoid malfunctions caused by inappropriate wiring.
- > Before powering on, please ensure that the wiring is correct to prevent damage to the driver or lighting fixture caused by incorrect wiring.
- ▶ If a malfunction occurs, please do not attempt to repair it yourself, if you have any questions, please contact the manufacturer.
- > The manual is for reference only. Please refer to the actual product. Any changes to this product will not be notified separately.
- ➤ For more information, please send an email to fei.l@jisim-tech.com.

Warranty Terms

- ► The product is warranted for 5 years. (The life and MTBF of the product are for reference only, and do not represent a warranty statement.)
- > During the warranty period, if any quality issues arise, JISIM will provide free repair or replacement services.

Non-Warranty Terms

The following situations are not covered by the free warranty or replacement service:

- ➤ The warranty period has expired.
- $\blacktriangleright \ \, {\sf Damage\ caused\ by\ human\ factors\ such\ as\ overvoltage,} overload, or\ improper\ operation.$
- ➤ Deformation or damage to the exterior appearance.
- ➤ Damage caused by natural disasters or other irresistible human factors.
- ➤ The warranty label has been torn off or removed.
- ➤ No contract or invoice proof is provided.

Notice:

- 1. Repair or replacement provided is the only remedy for customers. JISIM is not liable for any incidental or consequential damage unless it is within the law.
- $2. \ JISIM \ has the right to amend or adjust the terms of this warranty, and release in written form shall prevail.$
