Connection instructions

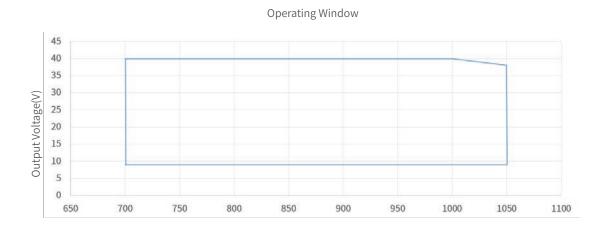

- 1.Rated torque: M2.6,0.35~0.40N.m
- 2. All connections must be as short as possible to ensure good EMI performance.
- 3. No secondary switches are allowed.
- 4.The driver output does not support hot swap
- 5.Incorrect wiring can damage the LED.
- 6. The power cable should be kept at a certain distance from the driver and other connecting cables (5-10cm recommended)

Product Characteristic Curves

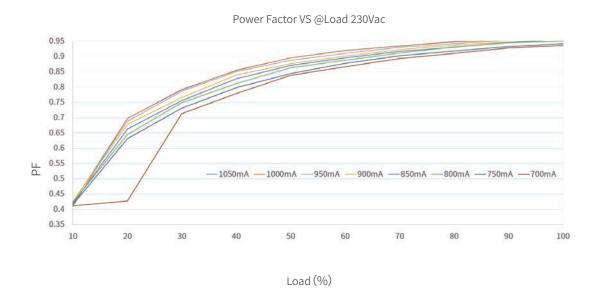

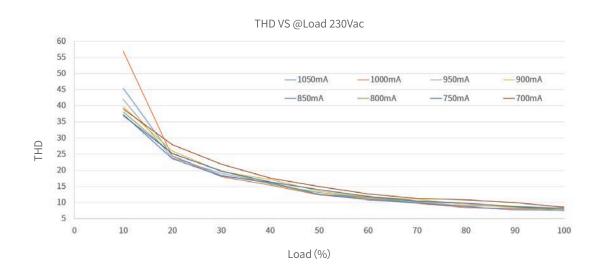

The life-time of the LED driver is shown in the figure above calculated (based on the 90% survival rate). The relation of tc to ta temperature depends also on the luminaire design.
