

DALI-2 DT8 Tunable White Dimmable LED Driver

Product Introduction

JISIM JD3225 is a constant-current LED intelligent tunable white dimmable driver, specifically designed for small-aperture embedded lighting fixtures. It supports DALI dimming and color temperature adjustment functions, and its customized dimming curve offers a more comfortable viewing experience for the human eyes. When not connected to external signals, it can be used as a non-dimmable driver. It is suitable for LED downlights, LED linear lights, and LED panel lights, and is widely applied in projects such as smart homes, smart hotels, intelligent commercial lighting, smart offices, smart buildings, and large public facilities, when paired with intelligent control systems.

Product Features

- Compact SELV independent dimmable driver
- Support DALI-2 dimming
- Input 100-240V~,Global Certification
- Suitable for Class I/ II /III indoor light fixtures.
- Smooth dimming, flicker-free, dimming range 0.1-100%
- Small size and light weight, High power factor, High Efficiency, Low THD
- Standby power consumption < 0.5 W, meets ErP energy efficiency certification
- The housing is made from V0 flame retardant PC materials from CHIMEI
- DIP switch for multi-current setting, Max. output power 12W
- Up to 50000 hours life time, 5-Year Warranty (Long-lasting Capacitor)

Technical Specifications (All parameters not specially mentioned are measured at 230VAC input, full load and 25°C of ambient temperature)

Wiring Diagram

Remark:

The two DALI control lines polarity-reversible.

Default setting brightness is 100%.

The default is logarithmic dimming curve.

Max. 64 DALI drivers per DALI control line.

The current consumption of the DALI interface is less than 2mA.

The maximum distance length of the DALI control line is 200m at 2x1.0mm.

DALI bus can be wired together with any mains voltage cables, but separate wiring is recommended.

Max. 64 DALI drivers per DALI control line. DALI protocol includes Max. 16 scene groups and 16 scenes.

The configuration parameters of the driver can be set through the DALI configuration tool or DALI application controller during installation, such as setting device address, group address, power-on level, bus-failure level, scene level, fade time, dimming curve, etc.

Installation Instructions

Interface	Marking	Description	Wire cross section	Wire Stripping Length
Input	L	Input terminal of AC live wire	0.75...1.5mm ² (16-18AWG)	5...6mm
	N	Input terminal of AC neutral wire	0.75...1.5mm ² (16-18AWG)	5...6mm
Output	LED+	Positive electrode output of the driver	0.5...1.0mm ² (16-20AWG)	5...6mm
	LED-C	Negative electrode output of cold light	0.5...1.0mm ² (16-20AWG)	5...6mm
	LED-W	Negative electrode output of warm light	0.5...1.0mm ² (16-20AWG)	5...6mm

Connection Instructions:

1. Rated torque: M2.6, 0.35~0.40N.m
2. All connections must be as short as possible to ensure good EMI performance.
3. No secondary switches are allowed
4. Incorrect wiring can damage the LED

Product Characteristic Curves

The life-time of the LED driver is shown in the figure above (calculated based on the 90% survival rate).

The relation of tc to ta temperature depends also on the luminaire design.

Cautions

- This product is used as a component in conjunction with a lighting fixture.Due to the influence of EMC from the lighting fixture and wiring, customers should perform EMC testing to confirm the entire product set.
- No operation with power on.Installation and debugging should be performed by qualified professionals.Please read the product manual carefully before installation.
- This product can only be used outside the light body, Cannot be used inside of the light,and it must be used within the specified working environment.
- This product is not waterproof and should be avoided from direct sunlight and rain.if it is installed outdoors,please use a waterproof case.
- Good heat dissipation conditions are beneficial to the product's lifetime.Please install the product in a suitable environment,and strictly prohibit using double-sided tape to attach the casing or circuit board.
- Please check the parameters of the LED driver to ensure they meet the application requirements of the lighting fixture.
- Please install according to the standard wire gauge specified in the manual to avoid malfunctions caused by inappropriate wiring.
- Before powering on,please ensure that the wiring is correct to prevent damage to the driver or lighting fixture caused by incorrect wiring.
- If a malfunction occurs,please do not attempt to repair it yourself;if you have any questions,please contact the manufacturer.
- The manual is for reference only.Please refer to the actual product.Any changes to this product will not be notified separately.
- For more information, please send an email to fei.l@jisim-tech.com.

Warranty Terms

- The product is warranted for 5 years.(The life and MTBF of the product are for reference only, and do not represent a warranty statement.)
- During the warranty period,if any quality issues arise,JISIM will provide free repair or replacement services.

Non-Warranty Terms

The following situations are not covered by the free warranty or replacement service:

- The warranty period has expired.
- Damage caused by human factors such as overvoltage,overload,or improper operation.
- Deformation or damage to the exterior appearance.
- Damage caused by natural disasters or other irresistible human factors.
- The warranty label has been torn off or removed.
- No contract or invoice proof is provided.

- 1.Repair or replacement provided is the only remedy for customers.JISIM is not liable for any incidental or consequential damage unless it is within the law.
- 2.JISIM has the right to amend or adjust the terms of this warranty,and release in written form shall prevail.
